## 8<sup>th</sup> M'Sila Conference on Mathematical Analysis

*Banach spaces and operator theory, M'sila, October 23<sup>rd</sup>, 2024*

This event has built on the tradition of previous editions organized by LFAGS, held between 2014 and 2018, which were previously known as "Mathematical Days." After a short pause due to the COVID-19 pandemic, the series was revived in 2022 under a new name, MCMA, which better aligns with the disciplines and themes explored in these conferences. The eighth edition of MCMA aims to support both young and experienced researchers working in the field of functional analysis and its applications, with a special emphasis on Banach spaces and operator theory.

### Topics:

- The geometry of Banach and metric spaces
- Linear and nonlinear operator theory
- Functional analysis of PDEs and ODEs

The conference will be held face-to-face

Registration Fees PhD Students : 1500 DA/ Researchers : 4000 DA
